Other Work Experience

My work life has always been, primarily, independent and self-driven. I'm an entrepreneur and real estate investor, at heart. Besides blocks of time spent teaching, I've also: bought and sold numerous properties, created a mobile home park in Houston, TX from nothing, owned a donut shop in Houston, TX, worked as a Realtor in Houston, TX and always eyed opportunities to work on projects that make me happy. I spent 5 years in Texas after leaving Los Angeles. I came to California and since then I have: earned my real estate license and then my real estate broker license, started a small property management business, purchased, renovated and manage my own commercial property in my hometown, purchased, renovated and manage two vacation (Airbnb-Superhost!) rentals and regular full time rental. Most of my endeavors have been self-directed and full of self-motivation.
